Problem 9

Use a sub-query to find the name of the community area with highest hardship index

```
[75]: %sql select "COMMUNITY_AREA_NAME", "HARDSHIP_INDEX" from CENSUS_DATA \
      where "COMMUNITY_AREA_NAME" in \
      ( select "COMMUNITY_AREA_NAME" from CENSUS_DATA order by "HARDSHIP_INDEX" desc limit 1 );
```

```
sqlite:///ChicagoCensusData.csv.db
sqlite:///ChicagoCrimeData.csv.db
sqlite:///ChicagoPublicSchools.csv.db
* sqlite:///FinalDB.db
```

Done.

```
[75]: COMMUNITY_AREA_NAME  HARDSHIP_INDEX
      Riverdale            98.0
```

Problem 10

Activate Windows

Go to Settings to activate Windows
