DB0201EN-PeerAssign-v5-S ×

Code

Run as Pipeline   Python

Problem 10

Use a sub-query to determine the Community Area Name with most number of crimes?

```
[74]: %sql select "COMMUNITY_AREA_NAME" from CENSUS_DATA \
          where "COMMUNITY_AREA_NUMBER" in \
      (select count(COMMUNITY_AREA_NUMBER) from CHICAGO_CRIME_DATA GROUP BY COMMUNITY_AREA_NUMBER ORDER BY COUNT(COMMUNITY_AREA_NUMBER) DESC LIMIT 1)
```

        sqlite:///ChicagoCensusData.csv.db
        sqlite:///ChicagoCrimeData.csv.db
        sqlite:///ChicagoPublicSchools.csv.db
       * sqlite:///FinalDB.db
       Done.

[74]:   **COMMUNITY_AREA_NAME**

                    South Shore
